

MARINE  
BREYNAERT

## About

Marine Breynaert was born in 1982 in Paris. She received her formal training at the prestigious École Nationale Supérieure des Arts Décoratifs in Paris.

In 2010, she established the Atelier Marine Breynaert, with a primary focus on crafting high end lighting fixtures. Her creative journey weaves a visual tapestry of minimalist lines, a keen appreciation for textures, and a mastery of material effects. Over the years, she has honed her expertise with unyielding dedication. Every creation is a testament to precision and is the result of close collaboration with french artisans.

Marine's work is characterized by the intricate patinas, contrasting lacquers, and lampshades that are designed to sculpt and play with light. Her commitment to excellence and exacting craftsmanship has allowed her to unite diverse design legacies. Her lighting fixtures stand as visual enigmas, seamlessly blending elements of industrial design with the poetry of contemporary art.

At the beginning of the creation of each object, there is a research: upcycling on one hand, since the recovery of unused industrial parts was at the basis of her first creations; but also, the technical and almost scientific research required by the juxtaposition of certain elements.
